PROFESSIONAL SUMMARY

Full-Stack Engineer with 4+ years building and shipping production web applications, dashboards, REST APIs, and AI-powered product experiences using TypeScript, NestJS, Node.js, React, and PostgreSQL on Google Cloud Platform. Experienced integrating third-party platforms including OpenAI and LLM services, and proficient with AI-assisted development tools including Claude Code, GitHub Copilot, and Cursor. Currently building NNACT Pro - a real-world AI-integrated field service platform with automated content pipelines, multi-platform publishing to LinkedIn, Facebook, and Instagram, and Claude-powered blog generation.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML5/CSS3, Responsive UI, React Native

Backend: NestJS, Node.js, REST API design, JWT auth, RBAC, Async Queuing, Microservices

AI & LLM: OpenAI API, Claude API, LLM integration, Prompt engineering, Claude Code, GitHub Copilot, Cursor

Automation: Scheduled content pipelines, Multi-platform social publishing, Marketing automation

Third-party APIs: OpenAI, Claude API, Meta Graph API, Google Ads API, GCP services

Databases: PostgreSQL, Schema design, Query optimisation, Indexing, Migrations

Cloud & DevOps: GCP (Cloud Run, Cloud Build, Cloud Logging, GCS, IAM), GitHub Actions, Docker, CI/CD

Engineering: Git, Software architecture, Code review, Testing, Debugging, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full-Stack Engineer - CSKY Telecom, Limbe: Oct 2025 - Present

- Built and maintained production web applications and backend services using NestJS, TypeScript, and React; deployed on GCP Cloud Run with sub-200ms API response times and 99.9% uptime.
- Designed and automated end-to-end CI/CD pipelines using GitHub Actions and Google Cloud Build; eliminated ~70% of manual deployment steps enabling multiple automated production releases per week.
- Architected async background processing pipelines decoupling long-running tasks from the request cycle; reduced UI wait time by over 60% for high-load operations.
- Administered GCP Cloud Storage with fine-grained IAM policies and instrumented services with Cloud Logging and Cloud Monitoring; built alerting policies reducing mean time-to-detection for production incidents.
- Used AI-assisted development tools including Claude Code and GitHub Copilot daily to accelerate feature delivery while maintaining high standards for security and code quality.

Full-Stack Developer - NNACT Home Appliance & Maintenance Services, Buea: 2024 - Present

- Architected and built NNACT Pro: a full-stack field service management platform covering customer management, equipment tracking, work orders, technician dispatch, quotations, invoicing, payments, inventory, and preventive maintenance workflows.
- Designed an Institutional Repair Brain: a structured AI-ready knowledge base with a Job to Diagnosis to Repair to Outcome to Verified Knowledge promotion pipeline.
